Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values--Wave 3, Public In Home Questionnaire

Variable Name and Label (Total Cases = 4882)	Percent of Cases with Missing Values
2.1% (38 of 1851 variables)	have 0% Missing Values
17.2% (319 of 1851 variables)	have 0% - 1% Missing Values
3.9% (73 of 1851 variables)	have 1% - 3% Missing Values
1.0% (19 of 1851 variables)	have 3% - 5% Missing Values
1.0% (18 of 1851 variables)	have 5% - 10% Missing Values

PARTNER	PARTNER SAMPLE-W3																															
Location:	35-35 (width: 1; decimal: 0)																															
Variable Type:	numeric (ISO)																															
Interval:	discrete																															
Question:	Partner Sample. When the Wave III field work began, approximately one half of the fielded Add Health respondents were randomly flagged to be part of the Partner Sample. When a respondent with PARTNER = 1 was interviewed and if the respondent had an eligible relationship, the respondent was asked to recruit his/ her partner for the study. This relationship is identified as the Couple Sample (CP) relationship in Section 19. Additional information about the Couple Sample is available in the document "sect19_descriptions.pdf."

COUPLE

COUPLE INTERVIEW-W3

Location: 37-37 (width: 1; decimal: 0)

Variable Type: numeric (ISO)

Interval: discrete

Question: Couple Sample. The eligible partner, when interviewed for the Couple Sample, has a value of 1 for COUPLE. Original Add Health respondents only have a value of 0 for COUPLE. This variable was used for questionnaire branching and to identify interviews from partners of Add Health respondents. The partner interview data are available in separate files by special request.

PRMOM

MOTHER FIGURE AT LAST INTERVIEW-W3

Location: 38-39 (width: 2; decimal: 0)

Variable Type: numeric (ISO)

Interval: discrete

Range of Missing Values (M): 99 , .

Question: Mother Figure at Last Interview. Variables PRMOM and PRPOP were created from responses to the Wave I or II household roster information. If a respondent indicated that he/she lived with a mother figure, but not a father figure, then the value for the father figure would be coded as missing and likewise if they lived with a father figure and not a mother figure. When a respondent did not list both a mother and father figure, then he/she was asked the questions "Who in your household acts a mother figure?" and "Who in your household acts as a father figure?" which had no one as an allowable response. Respondents who lived alone at the time of their last interview also received codes of (99) (no one) for PRMOM and PRPOP.

H3WP9
S3Q9 YOUR AGE WHEN SHE DIED-W3

Location: 459-460 (width: 2; decimal: 0)

Variable Type: numeric (ISO)

Interval: discrete

Range of Missing Values (M): 97 , 98

Question: How old were you when she died? The range for the age of the respondent at the death for his/her mother exceeds the range of the age of Wave III respondents for seven cases. These data values were not recoded as it is possible that the respondent could have misinterpreted the question and thought we asked for the age of his/her mother when she died.

S8Q26C DETAIL JOB CLASS/CURR JOB-W3

Location: 1388-1394 (width: 7; decimal: 0)
 Variable Type: numeric (ISO)
 Interval: discrete
 Range of Missing Values (M): 9999996 , 9999997 , 9999998 , 9999999 , .
 Question: Out of these categories of [Q.26B], which one best describes this job?
